

# USER MANUAL

- Instructions To Run Web application
  - To run our Web application deployed on streamlit please refer to the “User Guide” section in our project report.
  - To test the web application, we have provided some sample images. You can find these images under “Miscellaneous/Dataset/Dataset\_To\_Test\_Website”
  - **Disclaimer:** We have used the free version of streamlit cloud, therefore if you encounter an error saying, “Resource exceeded, please try again after some time”, then wait for 10 minutes and try again.
  - To run our web application offline please refer to the “To run on local machine (Windows)” section in our project report.
    - To create an API key (mentioned in the report) it’s better to use a temporary mail id for example(<https://generator.email/>)
    - **Disclaimer:** We haven’t provided our API\_KEY since it was advised not to share it anywhere public. If you are facing any difficulty in generating the API\_KEY, please contact us. We can share it via mail for your private use and please remove it before you upload it to any public platform like GitHub.
- Instructions to download both raw data and prepared dataset
  - We have uploaded the entire dataset used for training and testing the model into google drive and provided a downloadable link.
  - You can find the link under the path “Miscellaneous/Dataset/Full\_Dataset”.
- Instructions to download all models generated during experimentation
  - We have uploaded all our models built during experimentation into google drive and provided a downloadable link.
  - You can find this link under the path “Miscellaneous/Models”
